

Jenson T.C. Lau

Jenson91@uw.edu | (206)-488-7847 | Seattle, WA (Willing to Relocate) | <https://www.linkedin.com/in/jenson-lau>

PROFESSIONAL SUMMARY

Quantitative researcher with a PhD background and 4+ years of experience in talent development, psychometrics, and scalable program design. Expertise in applying advanced statistical methods (R) to generate actionable, data-driven insights that inform executive decision-making.

EDUCATION

University of Washington, Foster School of Business

Seattle, WA

Ph.D. in Organizational Behavior

Expected June 2026

Concentration: Psychometrics & Applied Analytics

Temple University

Philadelphia, PA

M.S. in Business Research, Fox School of Business

August 2019- May 2021

Georgia Institute of Technology

Atlanta, GA

B.S. in Electrical Engineering

August 2013- December 2015

SKILLS & TOOLS

- Survey methodology (design, sampling, weighting, deployment at scale)
- Experimental design & causal inference
- Statistical modeling (SEM, mediation/moderation, correlation modeling, Monte Carlo Simulation)
- Tools: R, survey platforms (Qualtrics), visualization (ggplot)

WORK EXPERIENCE

Graduate Research Assistant

Seattle, WA

University of Washington

June 2021-Present

Graduate Research Assistant

Philadelphia, PA

Temple University

August 2019- May 2021

Research Assistant

Singapore

National University of Singapore

June 2017- April 2019

Patent Engineer

Hong Kong SAR

Artesyn Embedded Technologies

March 2016- May 2017

RELEVANT EXPERIENCE

Power Analysis & Research Design

Seattle, WA (June 2023- June 2024)

- Designed and deployed survey studies ($N > 500$) with complex sampling logic, ensuring data quality through automated QA pipelines.
- Built simulation frameworks to evaluate user behavior under varying experimental conditions, improving decision-making about study design and statistical power.

Impact of Covariate on Power Analysis

Seattle, WA (June 2024- Present)

- Led an end-to-end research initiative to quantify how covariates impact statistical power in mediation analyses, addressing gaps in commonly used analytical approaches.
- Built scalable simulation frameworks spanning multiple study designs (surveys, experiments) and data types (binary, continuous) to model real-world research scenarios.
- Translated findings into actionable guidelines that improved study design decisions and reduced risk of underpowered analyses for applied researchers.

Mindfulness and Leadership

Seattle, WA/Frankfurt, Germany (June 2025- Present)

- Collected and managed cross-national data in Germany, ensuring consistency and data quality across repeated measures.
- Analyzed treatment effects using longitudinal and mediation models to identify mechanisms driving changes in leadership and well-being outcomes.
- Generated insights on intervention effectiveness to inform evidence-based leadership development and organizational practices.
